

Dr. Mohamed Aslam

Dr. Mohamed Aslam is an academician, researcher, and technology professional with extensive experience spanning higher education, scientific research, academic administration, and the software industry. An alumnus of Farook College, he pursued his postgraduate studies and Ph.D. at the University of Calicut. His academic career includes teaching and leadership positions at Farook College, Government Victoria College, Palakkad, Government Engineering College, Kozhikode, Government College, Koyilandi, and Government College, Kozhikode. He retired from Government service as an Associate Professor, having also served as Principal-in-Charge. His research interests include the effects of space radiation on sensitive electronic devices used in satellite systems. He was also a Co-Investigator in a Department of Science & Technology (DST)-supported research project on trace-element analysis in medicinal plants and compound herbal formulations. Following his academic career, Dr. Aslam moved into the technology sector and currently serves as Chief Operating Officer (COO) of MESHILOGIC Software. His combined experience in academia, research, administration, and technology enables him to contribute to the institution's vision of integrating academic education with industry-relevant skills and preparing students for evolving professional opportunities.
